Water & Sewer Division

Highland's Water & Sewer (W & S) division is made up of a 6 man crew. Their responsibilities include water main installation, water main repair, fire hydrant flushing, fire hydrant testing, sanitary sewer main jetting, and manhole maintenance. The division has a total of 67 miles of water mains and 42 miles of sanitary mains that they are responsible for keeping in good working order.

Regular duties for this division include, but are not limited to:

- } Fire hydrant flushing. The hydrant flushing helps maintain the drinking water quality and is also a time to perform routine maintenance on the hydrants.
- } Jetting and televising of sewer mains. Crews work on a monthly maintenance schedule to inspect and maintain sewer mains to help prevent sewer blockages and backups.
- } Emergency repairs to broken water lines

This summer the division will be replacing an old water main on 12th Street between Laurel Street and Mulberry Street. In addition, they also plan on replacing a couple sections of old sewer main. The sewer line at the end of Laurel Street and a section of line on Old Trenton Road and 13th Street will be replaced.
